JS & DEVOPS

quintagroup

WHO WE ARE

Quintagroup is a web solutions company

that has been working as a provider
of Python development services
for more than a decade.

Our business portfolio runs deep and
wide, providing clear proof of our
many capabilities.

WHAT WE DO

We do Python development in four steps:

Through project assessment to its development and implementation, we create impactful web applications and software.

Our goal is to help you build products your customers will fall in love with.

1

**Your vision,
ideas, and needs**

2

**Business
analysis**

3

**Development and
Automation QA**

4

**Maintenance
and support**

AREAS OF EXPERTISE

The world of software and web is evolving in a real-time environment, that is why we invest heavily in updating our development skills and technology expertise in various Python frameworks, like Django, Pyramid, and Flask, as well as JavaScript development services and DevOps.

Check out the main technologies we provide

django

The Django logo, featuring the word "django" in a lowercase, white, sans-serif font on a dark blue background.

User authentication, Object Relational Mapper, URL dispatcher, Django templates, migrations, are the praiseworthy features of **Django**.

The Pyramid logo, consisting of a cluster of white dots of varying sizes on the left, followed by the text "powered by pyramid" in a white, lowercase, sans-serif font on a dark blue background.

Pyramid is defined by its simplicity and speed, fast execution of common tasks, and catering for both small and large applications.

The Flask logo, featuring a white silhouette of a flask on the left and the word "Flask" in a white, serif font on a dark blue background.

The Python web framework **Flask** is known as a microframework as it does not need any special libraries or tools to work with.

The TurboGears logo, featuring a white gear icon with a stylized 'G' inside on the left, followed by the text "TurboGears" in a white, sans-serif font on a dark blue background.

Turbogears holds tools to develop data-based web applications in minutes. All with easy templating and AJAX on the browser and server sides.

The Web2py logo, featuring the text "WEB2PY" in a white, uppercase, sans-serif font on a dark blue background.

Easy to use and deploy, full-stack and secure, **web2py** is a framework with error logging and ticketing system that ensures error tracking.

PYTHON

Python is a part of the success formula for maximum productivity, top quality, and user-friendly maintainability at many companies and organizations around the globe.

Nasa. Google. YouTube. Instagram.

All of them are based on Python.

Be among the most demanding tech users and choose Quintagroup as the provider of excellence in the following Python services.

Take advantage of Python

- Laconic syntax that accelerates the process of development, code review, and future support
- Tight-knit passionate community that assists every Python user
- Open-source license with the thriving environment of free-to-use tools
- One of the largest collection of universal frameworks and libraries that may be applied in any sphere

Quintagroup

★★★★★ 8 REVIEWS

"I don't think there is anything they can't do."

CEO, Health Organization

We work with our clients according to the
3 models of cooperation

Fixed price

- Minimal risks
- Unchangeable price and scope of work
- Settling of deadlines before the launching

Dedicated team

- Changeable scope of work
- Full-time extension of your development team
- Decision-making and total control

Time and material

- Agreed rate per hour
- Projects with unclear terms and frequent changes
- Adjustment of team members according to the conditions

WHY CHOOSE US

Our team of highly qualified Python developers is unrivaled and we offer a wide canvas of services that have been grouped above.

With Quintagroup as your IT service provider, you are guaranteed to get:

Fast Delivery Time

Cost-Effective Solutions

Trust and Reliability
